

# Tether USD (USDT)

## Whitepaper v1.0

## Executive Summary

Tether USD (USDT) is a digital asset deployed on the BNB Smart Chain. The project focuses on providing a secure and transparent digital asset designed for fast, low-cost transactions across the BNB Chain ecosystem.

## Mission

To enable efficient blockchain-based transfers while maintaining transparency, accessibility, and scalability for users worldwide.

## Token Information

Token Name: Tether USD

Symbol: USDT

Network: BNB Smart Chain (BEP-20)

Total Supply: 1,000,000,000 USDT

Contract Address: 0x316A54D653a39B8fE99129C63afDC97E4947f27E

## Core Features

- Fast transactions on BNB Chain
- Low transaction costs
- Transparent on-chain activity
- Wallet compatibility across the BNB ecosystem
- Community-focused growth strategy

## **Token Utility**

USDT may be used for transfers, ecosystem participation, trading, and integration with decentralized applications that support BEP-20 assets.

## **Roadmap**

Phase 1: Smart Contract Deployment and Website Launch

Phase 2: Community Growth and Marketing

Phase 3: Ecosystem Partnerships and Integrations

Phase 4: Long-Term Expansion and Adoption

## **Security & Transparency**

All transactions can be independently verified on-chain through BscScan. Users should verify the official contract address before interacting with the token.

## **Official Contract**

0x316A54D653a39B8fE99129C63afDC97E4947f27E

## **Disclaimer**

Digital assets involve risks. Users should perform their own research and assess all risks before acquiring or using any blockchain-based asset.
